Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicant's election of Group II in the reply filed on 11/19/09 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 319-333, 335-362 are rejected under 35 U.S.C. 102(e) as being anticipated by Ju et al. US 6,664,079.

Ju et al. discloses a dye composition comprising a fluorescent dye (col. 13) linked to a moiety comprising an aromatic group, heteroatomic substituents, unsaturated groups and peptide linkage (NH-CO). Said composition is covalently attached to a target via a carbon-carbon linkage. Said target can be a nucleotide analog. (See Figure 7, 15B and 16).

Figure 16 shows ring structure comprising ring structures having polar or charged units such as SO₃.

Instant claims 344-345 are also rejected because said claims do not specifically state that the R group is limited to the metallo-organic moiety. The embodiment of claim 343 is still included in those claims which include therefore the R group being alkene, alkyne.

Claim 334 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
